INDEPENDENT AUDITOR'S REPORT

To the Board of Trustees
Lake County Public Water District
Zion, Illinois

We have audited the accompanying financial statements of the Lake County Public Water District as of and for the years ended April 30, 2020 and 2019, and the related notes to the financial statements, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Lake County Public Water District of the City of Zion, Illinois, as of April 30, 2020 and 2019, and the changes in financial position and cash flows thereof for the years

eder,
casella
&
co

then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis and other required supplementary information as listed in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Lake County Public Water District's basic financial statements. The supplementary information as listed in the table of contents is presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplementary information are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Lake County Public Water District's basic financial statements. The statistical tables and graphs are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on it.

REQUIRED SUPPLEMENTARY INFORMATION

LAKE COUNTY PUBLIC WATER DISTRICT
MANAGEMENT'S DISCUSSION AND ANALYSIS
APRIL 30, 2020

The General Manager and Board of Trustees offer the readers of the Lake County Public Water District's (District) financial statements this narrative discussion and analysis of its financial activities for the fiscal year ended April 30, 2020. Please consider the information presented here in conjunction with the District's financial statements.

FINANCIAL HIGHLIGHTS

Financial highlights of the District are summarized as follows:

- The results of operations for the year resulted in an operating income of \$807,843. After considering interest and other income and expense, the net result for the year was \$716,501 of net income.
- The 2020 demand for water decreased 3.23% from 2019 levels to 855,169,000 gallons. The District had delivered 883,744,000 gallons in 2019.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. Because it is a special-purpose entity providing treated water to three customers who are also governmental entities, the District maintains a single proprietary fund to account for its operations. Accordingly, the financial statements are similar to the financial statements of a business enterprise. As such, the basic financial statements include two components:

1. Financial statements consisting of Statements of Net Position, Statements of Revenues, Expenditures, and Changes in Net Position, and Statements of Cash Flows.
2. Notes to Financial Statements.

This report also contains other supplementary information in addition to the basic financial statements. Such information consists of a summary of activity in restricted net position and water treatment and pumping statistics.

Financial Statements

The financial statements are designed to provide readers with a broad overview of the District's finances in a manner similar to a private sector business.

The Statement of Net Position presents information on all of the District's assets and liabilities, with the difference between the two totals reported as Net Position. Over time, increases and decreases in net position may serve as a useful indicator of the District's financial position.

The Statement of Revenues, Expenditures, and Changes in Net Position is focused on the net results of the District's water treatment and distribution operations where the fees for service are intended to cover the costs of operations including depreciation, suitable reserves for working capital requirements, and satisfaction of covenants with the District's bond holders and other financing sources.

These financial statements and the Statement of Cash Flows can be found on the pages listed in the table of contents.

Infrastructure Assets

By its nature as a proprietary activity, the District has historically included infrastructure assets (roads, bridges, underground lines, and the like) in the Property, Plant, and Equipment accounts. Further, it has consistently computed depreciation on these assets.

Notes to Financial Statements

The notes provide additional information that is essential to a full understanding of the information provided in the District's financial statements. The Notes to Financial Statements can be found on the pages listed in the table of contents.

Other Information

In addition to the basic financial statements and accompanying notes, this report also presents certain Required Supplementary Information. Such information can be found on the pages listed in the table of contents.

The District has chosen to present a number of statistical tables and graphs which can be found on the pages listed in the table of contents.

FINANCIAL ANALYSIS OF THE DISTRICT

The District's net position increased during the year which ended April 30, 2020 by \$716,501 from the 2019 balance of \$6,251,481 to the 2020 balance of \$6,967,982.

Lake County Public Water District's Statement of Net Position
(In Thousands)

	4/30/20	4/30/19
Current and Other Assets	\$ 4,003	\$ 3,791
Capital Assets	7,840	8,152
Deferred Outflows of Resources	94	107
Total Assets	<u>\$ 11,937</u>	<u>\$ 12,050</u>
Long-Term Liabilities	\$ 3,846	\$ 4,660
Other Liabilities	1,043	1,058
Deferred Inflows of Resources	80	80
Total Liabilities	<u>\$ 4,969</u>	<u>\$ 5,798</u>
Net Position		
Invested in Capital Assets		
Net of Related Debt	\$ 3,296	\$ 2,806
Restricted	2,926	2,749
Unrestricted	746	697
Total Net Position	<u>\$ 6,968</u>	<u>\$ 6,252</u>

The District's improved net position for 2020 is the result of a \$716,501 net income. The \$716,501 total for 2020 compares unfavorably with the 2019 change of \$740,750.

Total revenue for 2020 of \$2,588,983 is \$11,767 more than the \$2,577,216 reported in 2019.

Lake County Public Water District's Changes in Net Position
(In Thousands)

	4/30/20	4/30/19
REVENUES		
Delivery Charges	\$ 1,271	\$ 1,310
Renewal and Replacement Charges	170	226
Availability and Other Charges	1,038	1,038
Miscellaneous Operating Revenue	110	3
Total Revenues	\$ 2,589	\$ 2,577
EXPENSES		
Operating Expenses Other Than Depreciation	\$ 1,235	\$ 1,201
Depreciation	546	534
Total Expenses	\$ 1,781	\$ 1,735
Operating Income/(Loss)	\$ 808	\$ 842
NON-OPERATING INCOME/(EXPENSES)		
Interest and Other Income	\$ 63	\$ 68
Interest Expense, Amortization, and Issuance	(155)	(168)
Total Non-Operating Income/(Expenses)	\$ (92)	\$ (100)
Change in Net Position	\$ 716	\$ 742
Net Position - Beginning of Year	6,252	5,510
Net Position - End of Year	\$ 6,968	\$ 6,252

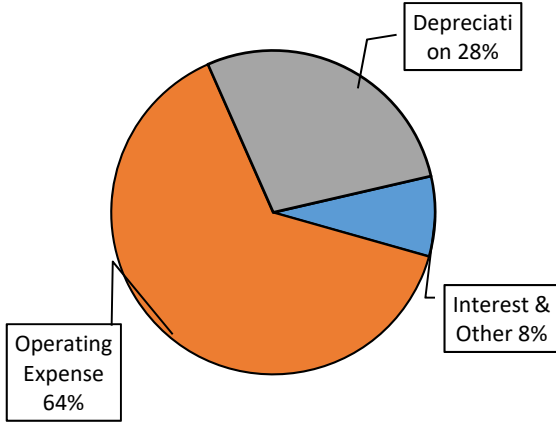

Significant factors affecting the change in net position for 2020 were:

- Renewal and replacement charges decreasing by \$56,410 due to reduced renewal and replacement expenses.
- Miscellaneous Operating revenue increased due to a grant for \$100,000.

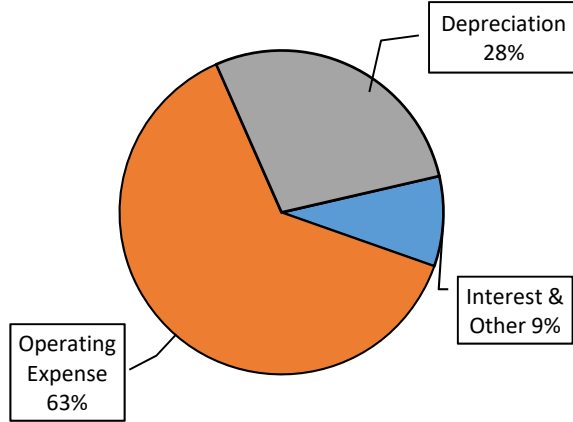

The charts which follow provide a graphic presentation of the District's revenue and expenses for 2019 and 2020:

Expenses for Fiscal Year 2020

Expenses for Fiscal Year 2019

CAPITAL ASSETS

At April 30, 2020 and 2019, the District's capital assets included land, buildings, machinery, motor vehicles, computers, and furniture and fixtures. These assets net of depreciation were:

Lake County Public Water District's Capital Assets at Year End
(In Thousands)

	4/30/20	4/30/19
Land	\$ 60	\$ 60
Water Plant Facilities and Equipment	7,773	8,092
Projects in Progress	7	-
Total	\$ 7,840	\$ 8,152

Detailed information concerning the capital assets can be found in Note 3 of the Notes to Financial Statements.

Economic Factors

The District treats and delivers water to three customers: The City of Zion; the Village of Winthrop Harbor; and the State of Illinois. These services are rendered under agreements with the two municipalities and the State of Illinois. Demand for water will continue on a course as seen in previous years.

Request for Information

This financial report is designed to provide a general overview of the District's financial position and activities for all those with an interest in its finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Office of the General Manager at 500 17th St., Zion, Illinois 60099.

LAKE COUNTY PUBLIC WATER DISTRICT
NOTES TO FINANCIAL STATEMENTS
APRIL 30, 2020 AND 2019

NOTE 1 - NATURE OF ACTIVITIES AND SIGNIFICANT ACCOUNTING POLICIES

The Lake County Public Water District (District) was created in 1951 under statute pursuant to a referendum of all municipalities in the County which were not already receiving Lake Michigan water to provide water service to the various communities. The office and plant is located in the City of Zion.

The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The most significant accounting policies used by the District are discussed below.

A. Reporting Entity

Generally accepted accounting principles require that the reporting entity include (1) the primary government, (2) organizations for which the primary government is financially accountable, and (3) other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete. The criteria have been considered and there are no agencies or entities which should be presented with the District.

B. Basic Financial Statements – Propriety Fund

The District uses proprietary fund accounting to report on its financial position and changes in its financial position. The focus of propriety fund measurement is upon determination of operating income, changes in net position, financial position, and cash flows. The accounting principles generally accepted in the United States of America which are applicable are similar to those of businesses in the private sector. Enterprise funds are used to account for operations for which a fee is charged to external users for goods or services and the activity:

- (a) is financed with debt that is solely secured by a pledge of the net revenues,
- (b) has third party requirements that the cost of providing services, including capital costs, be recovered through fees and charges, or
- (c) establishes fees and charges based on a pricing policy designed to recover similar costs.

C. Measurement Focus

Measurement focus is a term used to describe which transactions are recorded within the financial statements. Basis of accounting refers to when transactions are recorded regardless of the measurement focus applied.

The District utilizes an "economic resources" measurement focus. The accounting objectives of this measurement focus are the determination of operating income, changes in net position financial position, cash flows. All assets, deferred outflows of resources, liabilities, and deferred inflows of resources (whether current or noncurrent) associated with their activities are reported. Fund equity is classified as net position. Net position is reported in three parts – net investment in capital assets, restricted net position and unrestricted net position.

NOTES TO FINANCIAL STATEMENTS (Continued)

D. *Basis of Accounting*

The District utilizes the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when incurred. Propriety funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and production and delivering goods in connection with a proprietary fund principal ongoing operations. The principal operating revenues of the District are charges to customers for sales and services. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

E. *Cash and Cash Equivalents and Investments*

For purposes of reporting cash flows, the District considers all cash on hand, demand deposits, certificates of deposit, and U.S. government securities with maturities of three months or less as cash and cash equivalents. Certificates of deposit and U.S. government securities with maturities in excess of three months are classified as investments and are reported at cost, or amortized cost.

All monies derived from the operation of the waterworks system are, under the terms of the 2015 Water Revenue Bond Ordinance, to be credited and segregated monthly into the following accounts in the order shown to the extent that monies are available:

- Operation and Maintenance Account - Amounts sufficient to pay the reasonable expenses of operation, maintenance, and repair of the system for the next succeeding month. As of April 30, 2020 and 2019, the Board has made the decision to set aside \$216,000 in this account, which is more than the reasonable expenses of the next month.
- Bond and Interest Sinking Fund Account - Amounts sufficient to retire the principal and interest amount of bonds scheduled for retirement on May 1 of the following fiscal year. There is a balance of \$20,765 in this account at April 30, 2020 and \$20,535 in 2019. The principal and interest payment, due May 1, 2020, was paid before April 30, 2020.
- Bond and Interest Reserve Account - The District is required by the terms of its outstanding bond issue to maintain a bond and interest reserve account equal to the lesser of 10% of the amount of the original bond proceeds or the maximum annual debt service on all outstanding bonds. The minimum required amount at the end of April 2020 was \$798,104. Amounts in the reserve are to be used for the payment of the principal and interest on any outstanding water revenue bonds when there are insufficient funds available in the sinking fund and interest accounts. At April 30, 2020 and 2019, this account balance was \$825,000 and \$825,000, respectively. The Bond and Interest Reserve account is not to exceed \$825,000.
- Repair and Replacement Account - Under the terms of the provisions of the 2015 bond issues, the Board is obligated to fund a reserve for repair and replacement of capital assets. A similar provision was, and still is, a part of the District's agreement with its customers. The maximum reserve requirement is adjusted annually by the District's engineers. For the year ended April 30, 2020, the reserve requirement was \$2,038,400. As of April 30, 2019, the maximum reserve has been established at \$1,978,200. The balance available in the account at April 30, 2020 and 2019 was \$1,864,126 and \$1,687,067, respectively. The amount required to restore the account to its maximum is to be recovered from the District's customers in accordance with agreed formulas.
- Surplus Account - All monies remaining in the Water Fund at the end of the fiscal year after crediting the required amount to the respective accounts hereinabove provided for shall be

NOTES TO FINANCIAL STATEMENTS (Continued)

credited to the Surplus Account, and the funds in said account shall be held and used only for making improvements and extensions to the said waterworks properties, or for the purpose of calling and redeeming any Outstanding Bonds and Parity Bonds as said Bonds and Parity Bonds become redeemable according to their terms; provided, however, that the funds of said Surplus Account shall be transferred to any of the accounts listed above at any time for the purpose of making up any deficiencies.

F. *Receivables and Revenue Recognition*

All receivables are reported net of estimated uncollectible amounts.

G. *Prepaid Items*

Certain payments to vendors that reflect costs applicable to future accounting periods are recorded as prepaid items.

H. *Capital Assets*

Capital assets, which include land, land improvements, buildings and improvements thereto, plant and system equipment, vehicles, computers and office, and equipment are reported in the District's financial statements. Capital assets are defined as those property, plant and equipment items with an initial individual cost of more than \$5,000 and an estimated life of five years or more. For office equipment, capital assets include items with an initial individual cost of \$5,000 or more and a five year life. Such assets are recorded at cost or estimated historical cost if purchased or constructed. Donated capital assets, if any, are recorded at estimated fair value at the date of donation. Property, plant and equipment are stated at cost less accumulated depreciation. Depreciation has been provided using the straight-line method over the following useful lives of the assets:

<u>Assets</u>	<u>Estimated Useful Lives</u>
Plant and Improvements	5-40 years
Equipment	5-15 years
Computer Equipment	3-5 years
Automobiles	5 years

I. *Deferred Outflows and Inflows of Resources*

In addition to assets and liabilities, the Balance Sheets and Statements of Net Position will sometimes report separate sections for deferred outflows of resources and deferred inflows of resources. Deferred outflows of resources represent a consumption of net position that applies to a future period and so will not be recognized as an outflow of resource until then. Deferred inflows of resources represent an acquisition of net position that applies to a future period and so will not be recognized as an inflow of resource until that time.

At April 30, 2020, deferred charges of \$93,807 is the unamortized loss on the District's September 15, 2015 advance refunding of its 2009 bonds which were due to be paid during the years 2018 through 2026. Amortization for the 2020 fiscal year was \$13,401. The total loss of \$189,136 is amortized as an element of interest expense over the term of the bonds, using the bonds outstanding method. At the same time, the District is the beneficiary of the lower interest rates applicable to the 2015 refunding bonds. Overall, the District is expected to derive a net economic benefit of almost \$100,000.

NOTES TO FINANCIAL STATEMENTS (Continued)

J. *Compensated Absences*

The liability for paid time off is recorded during each calendar year when earned for subsequent use or for payment upon termination, death, or retirement.

K. *Net Position*

Net position is divided into three components:

1. Net Investment in Capital Assets – consists of capital assets (net of accumulated depreciation) reduced by the outstanding balances of the water revenue bonds that are attributable to the acquisition, construction, or improvement of those assets.
2. Restricted Net Position – consists of net position that is restricted by the District's creditors (for example, through debt covenants), and by the state enabling legislation (through restrictions on shared revenues).
3. Unrestricted Net Position – all other net position is reported in this category.

L. *Operating and Non-Operating Expenses*

Operating expenses include all expenses and depreciation related to the treatment and delivery of water including expenses for the administration of the District. Non-operating expenses consist of expenses not related to the District's day-to-day expenses to treat and deliver water. Currently, non-operating expenses consist primarily of interest on the District's long-term debt and the amortization of bond premiums and refunding losses paid or incurred at the time bonds were issued.

M. *Estimates*

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

NOTE 2 - CASH AND INVESTMENTS

State statutes authorize the District to invest in: direct obligations of federally insured banks and savings and loan associations; insured obligations of Illinois credit unions; securities issued or guaranteed by the U.S. Government; money market mutual funds investing only in U.S. Government-backed securities; commercial paper of U.S. corporations with assets over \$500 million; short-term obligations of the Federal National Mortgage Association; repurchase agreements; and the Illinois Treasurer's Pool known as The Illinois Funds.

At year-end, the carrying amount of the District's deposits for 2020 and 2019 were \$3,526,114 and \$3,507,094 respectively. The insured and collateral status of the bank balances was as follows:

	2020	2019
Covered By Federal Depository Insurance	\$ 3,500,000	\$ 3,500,000
Covered By Pledging of Securities Held By the Pledging Bank's Agent in the District's Name	21,397	17,727
	<u>\$ 3,521,397</u>	<u>\$ 3,517,727</u>

NOTE 4 - WATER REVENUE BONDS

On September 15, 2015, the District issued \$7,391,000 in Water Revenue Bonds. The bonds were issued in two series: 2015A \$4,482,000 and 2015B \$2,909,000. The 2015A bonds were issued to finance rehabilitation of solids contact units Nos. 1 and 2 and for stabilization of the water plant's intake pipe. The 2015B bonds were issued to advance refund that portion of the 2009 bonds due to be repaid in 2018 through 2026.

The 2015B Water Revenue Bonds totaling \$2,909,000 were issued at an average interest rate of 2.596% to advance refund \$2,695,000 of outstanding 2009 Water Revenue Bonds with an average interest rate of 4.483%. The net proceeds of \$2,863,965 (after payment of \$45,035 bond issuance costs) plus an additional \$45,041 of 2009 bond and interest sinking fund monies were used to purchase U.S. government securities. Those securities were deposited with an escrow agent to provide for all future debt service payments on the advance refunded portion of the 2009 Water Revenue Bonds. As a result, the advanced refunded portion of the 2009 Water Revenue Bonds are considered to be defeased and the liability for those bonds has been removed from the District's long-term debt.

NOTES TO FINANCIAL STATEMENTS (Continued)

Although the advance refunding resulted in the recognition of an accounting loss of \$189,136 for the year ended April 30, 2016, District, in effect, reduced its debt service payments by almost \$113,000 over the next 10 years and obtained an economic gain (difference between the present values of the old and new debt service payments) of \$99,352.

The following is a summary of the District's revenue bond transactions for the year:

	Balance			Current	
	April 30, 2019	Additions	Retirements	April 30, 2020	Maturities
2015A Water Revenue Bonds	\$ 3,212,000	\$ -	\$ 520,000	\$ 2,692,000	\$ 527,000
2015B Water Revenue Bonds	2,134,000	-	282,000	1,852,000	292,000
	<u>\$ 5,346,000</u>	<u>\$ -</u>	<u>\$ 802,000</u>	<u>\$ 4,544,000</u>	<u>\$ 819,000</u>

	Balance			Current	
	April 30, 2018	Additions	Retirements	April 30, 2019	Maturities
2015A Water Revenue Bonds	\$ 3,642,000	\$ -	\$ 430,000	\$ 3,212,000	\$ 520,000
2015B Water Revenue Bonds	2,492,000	-	358,000	2,134,000	282,000
	<u>\$ 6,134,000</u>	<u>\$ -</u>	<u>\$ 788,000</u>	<u>\$ 5,346,000</u>	<u>\$ 802,000</u>

Principal maturities and stated interest rates on the bonds outstanding at April 30, 2020 are:

Series A and B 2015 Water Revenue Bonds		
Maturity On May 1	Principal Due	Interest Rate
2021	\$ 819,000	2.30%
2022	837,000	2.50%
2023	858,000	2.70%
2024	880,000	2.90%
2025	820,000	3.15%
2026	330,000	3.30%
	<u>\$ 4,544,000</u>	

NOTE 5 - PENSION PLANS

Pension Plan: The District has a defined contribution plan covering all full-time employees who are at least 20 1/2-years-old and have been employed by the District for at least one year. Annual contributions to the plan are determined by the Board of Trustees and may not exceed 17% of covered payroll. District expense for the years ended April 30, 2020 and 2019 was \$75,822 and \$73,126 respectively.

Deferred Compensation Plan: The District maintains a deferred compensation plan for its employees structured and operated in accordance with the provisions of the Internal Revenue Code Section 457. The plan, available to all District employees, permits employees to defer a portion of their salaries until future years. The deferred compensation and accumulated earnings thereon are not available to employees until termination, retirement, death, or unforeseeable emergency. The plan is fully funded as the deferred compensation is earned by the employees.

NOTE 6 - RISK MANAGEMENT

The District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors or omissions; and injuries to employees. The District currently provides for workers' compensation coverage through the Illinois Public Risk Fund (IPRF), which is a public entity risk pool currently operating as a common risk management and insurance program for local governmental entities. The District pays an annual premium to IPRF for its workers' compensation coverage. The pooling agreement provides that IPRF will be self-sustaining

NOTES TO FINANCIAL STATEMENTS (Continued)

through member premiums and will reinsure through commercial companies for claims in excess of \$400,000 for each insured event. The District continues to carry commercial insurance for all other risks of loss. Settled claims resulting from these risks have not exceeded commercial insurance coverage in any of the past three fiscal years.

NOTE 7 - CERTAIN CONTRACTUAL OBLIGATIONS

In connection with the April 30, 2005 retirement of its General Manager, the District agreed to fund Medicare supplement premiums for the lives of him and his spouse. In accordance with generally accepted accounting principles, the District charged to expense at April 30, 2005 the \$65,683 estimated present value of these future payments. Each year, actual expenses paid for the Medicare supplement premiums are reduced by amortization of the 2005 provision. For 2020 and 2019, the amortization was \$4,350 and \$4,267, respectively.

Assumptions used in making the estimate of present value were that the cost of benefits would increase by 5% annually using an interest rate of 3% over the estimated remaining lives of the individuals covered by the agreement.

The former General Manager passed away in February 2011. Accordingly, the District's liability was reduced to reflect only the estimated present value of benefits accrued on behalf of the surviving spouse pursuant to the terms of the retirement agreement.

NOTE 8 - COMPLIANCE WITH BOND ORDINANCE PROVISIONS

In accordance with the Bond Ordinance for the sale of the 2015 A and B Water Revenue Bonds, the District deposited a portion of the proceeds of the sale in separately designated bank and investment accounts for the Bond and Interest Reserve and the Construction Fund. The District continues to comply with the agreement.

Also, under the terms of the Bond Ordinance, the District makes a monthly transfer to the reserve accounts as described in Note 1.

NOTE 9 - LITIGATION

The District's legal counsel has advised that all previous litigation has been settled by agreement among the parties. Management and counsel are not aware of any pending or threatened litigation.

NOTE 10 - SUBSEQUENT EVENTS

Prior to the date of this report, the COVID-19 outbreak in the United States has created disruptions in various businesses/non-profits and will continue to impact these organizations. While the disruption is currently expected to be temporary, there is considerable uncertainty around the duration of time. The extent of the impact on the District is uncertain and cannot be reasonably estimated at this time.

OTHER INFORMATION - STATISTICAL TABLES AND GRAPHS

Cost of Water

The calculation of a customer water rate is based on four components billed monthly. They are as follows:

1. Water rate per thousand gallons
2. Availability Charge based on outstanding debt
3. Renewal and Replacement
4. Refund and/or Charge

The water rate per thousand gallons is computed by taking the “Total Operating Expenses” from the “Statement of Revenue, Expenses and Changes in Net Position”, (see page 10 of the Audit Report) ,adjusting for depreciation and dividing by the finished water delivered to the customers. This figure is then multiplied by 110%, to determine the new water rate per thousand gallons. The additional 10% is to cover unexpected or inflationary operational cost increases, and volume changes for the following fiscal year.

The refund or additional charge is calculated on an adjusted Operations & Maintenance expense factor, multiplied by the actual delivered gallons of water to the District’s customers. This is then compared to the actual billings to determine an under or over billing. The difference is refunded or charged to each respective customer over a nine month period starting in July of each year.

The "Computation of Availability Charge", is calculated by multiplying each customer's proportional share of the treatment plant's capacity (by contract, Zion's share is 4.5 MGD/ 6.5 MGD) by the principal and interest debt payments for the upcoming fiscal year. Interest payments are due on November 1 and principal and interest payments are due May 1, until the bonds are paid in full. In addition, there is also a 10% coverage factor added to the above computation to ensure a sufficient amount in the reserve account, in the event of late payments, or unpaid bills. This 10% coverage charge is also used to reduce the charge discussed below.

The charge called “Repair and Replacement Contribution”; (R&R) is calculated annually. The “amount required for full funding” is determined by the District’s consulting engineer estimates of the replacement cost of the District’s waterworks facilities. This estimate is divided by 15 (which equates to two years’ cost on an average thirty-year depreciation cycle for the facilities). The difference between the current R&R account balance is subtracted from the “Amount Required for Full Funding” computation above. This difference is the required amount needed for full funding. When there is an outstanding bond issue, the coverage (10%) from the availability charge, is credited to the R&R account thus reducing the required funding. The net difference is then multiplied by each customer’s proportional share of plant capacity, by contract, (Zion 4.4/6.5) to obtain the funding required for the next fiscal year.
